Objective

Ambitious third-year Computer Engineering student with strong academic performance and practical experience in web development. Passionate about creating modern applications and exploring Artificial Intelligence and Machine Learning, with a focus on applying technical skills to innovative projects and professional growth.

Technical Skills

- Languages: C, C++, Python (basic), Java
- Web Development: HTML, CSS, JavaScript, React.js (beginner), Flask
- Database: MySQL
- Concepts: Data Structures, Algorithms, DBMS, Operating Systems, COA, Java, CN, DAA, Web Development, Python for Data Science, AI and ML Concepts
- Tools: Git, GitHub, VS Code

Language

- English
- Marathi
- Gujarati
- Hindi

Certifications and Achievements

- Participant, CVMU Hackathon 2025 (February) — Built the Scholarship Finder project in a 36-hour hackathon, focusing on usability and backend efficiency.
- Machine Learning Certificate – Talent Battle (2024)
- Selected in SIH 2025 Grand Finale

Education

- Bachelor of Technology - Computer Engineering**
Madhuben and Bhanubhai Patel Institute of Technology, CVM University, Anand, Gujarat 2023 - 2027
CGPA: 9.72 (Till 5th Semester)
- Higher Secondary Education (12th Grade)** 70.76 %
Vision School of Science, Nadiad, Gujarat March-2023
- Secondary Education (10th Grade)** 87.16%
English Teaching School, Nadiad, Gujarat March-2020

Projects

- Data Download Duplication Alert System (DDAS)**
Python · Flask · SQLite
Built a Flask-based file download system to prevent redundant downloads within a shared network. Implemented an MD5 hashing mechanism to detect duplicate files and notify users with existing file locations. Designed local and shared storage management, automatic metadata logging in SQLite, and in-browser file viewing for improved collaboration.
- Education Advisor Web Application**
React.js · Flask · Google Gemini API · MySQL
Developed an AI-powered web platform that helps 10th and 12th-grade students choose academic streams. Created a dynamic React quiz interface to assess interests and aptitudes, integrated Flask with Google Gemini API for personalized recommendations, and stored user data in MySQL. Delivered a responsive UI and intelligent decision support system for Science, Commerce, and Arts streams.
- Scholarship Finder Web Application**
HTML · CSS · Python · Flask · MySQL
Developed a responsive and interactive web application to help students discover relevant scholarships based on their profiles. Built a Flask backend integrated with a MySQL database to handle user input, filter results, and deliver real-time recommendations. Designed an intuitive frontend using HTML and CSS with a smooth scroll interface, enhancing accessibility and user experience for students across India.
- Study Buddy - A Smart Study Companion**
React.js · Node.js+Express · MongoDB · HTML · CSS
Study Buddy – Smart Study Companion is a web-based application designed to help students organize their study schedule, track progress, and improve productivity. The system provides smart reminders, subject-wise planning, and performance monitoring features to enhance learning efficiency. It focuses on user-friendly design and structured study management to support consistent academic improvement.
